CHICAGO

# The Beginning

- **A roof - top conversation**
- **The doubters**

# **Integrated Modeling**

- **The slow learning curve associated with work between hydrologist and economists**
- **Language and paradigm issues**
- **Doing SAHRA over again – a re- learning curve**

# **Market Construction and Performance**

- **A water market as a lemonade stand, but...**
- **The massive efficiency of our experiments**
- **New results concerning trading partners**

# **Third Party Effects**

- **Shift the burden of proof onto those that claim third party effects**
- **A multi-dimensional issue?**

# **Mimbres, NM and Public Policy**

- **Flexibility of the Mimbres population to explore trading platform**
- **Farmers are not normal economic folks**
- **Co-operative role of the Office of the State Engineer**
- **Exportability of the trading system**

# Concluding Comments

- **Informed voluntary exchange leaves both parties better off**
- **The “engineering approach” and economics**

**Thank You**
